

# Positively Liberating.

## The Liberator™ Credit Card System All-New... Just for You... from GinSan®

**Convenience for Your Customers... Higher Revenues for Your Wash!**

*Your customers buy gas, groceries, just about everything with their credit or debit card every day. Why not a wash for their vehicle too? It just makes sense. By adding the Liberator System to your wash, you're increasing your sales opportunities by not limiting your customer's payment options. And your wash is providing an improved experience for your customers by eliminating their fear of running out of quarters or tokens while their vehicle is still covered in soap. This is great for you too! No more quarters to count and deposit... credit card payments are automatically deposited into your account.*

***Designed to thrive in the harsh environment of your wash bays, the Liberator System will provide worry-free service for years. System software is provided by Verifone® and certified to be compliant with all of the new and upcoming requirements. The reader does not store account information, so there is no money or data to secure in your bays. And... you choose your own merchant account processor... flexibility and savings... ONLY from GinSan!***

### ***Specifications\*:***
